☰ Optimal Tinted Complexion Cream

TINTED DAY PROTECTION CREAMS WITH SPF 10

A little more is perfectly acceptable for demanding skin when vitality and radiance are required. Often, the initial signs of tiredness and stress end in paleness and fine wrinkles. Intelligent care is now needed! This includes a protective barrier to combat premature skin aging as well as cosmetic ingredients which lend the skin increased radiance and freshness.

Optimal Tinted Complexion Cream protects and cares for demanding skin during the day. Physical stress factors such as wind and sun, but also dust and dirt, are reduced and initial wrinkles plus signs of fatigue are optically concealed.

Particularly high-quality color pigments care for and protect the skin. The gentle tinting imparts the freshness of youthful skin whilst small wrinkles caused by dryness are optically concealed as if regarded through a soft focus lens.

Optimal Tinted Complexion Cream is easy to distribute and retains the skin's natural radiance throughout the entire day.

Home care application

To tint the skin, evenly distribute Optimal Tinted Complexion Cream over the face, including the eye area, after cleansing.

Tip: Also ideal as a foundation for make-up. The available color pigments provide subsequent make-up with a better hold.

ACTIVE SUBSTANCES

- **Saccharide isomerate:** Mixture of various sugars produced from plant-based glucose which bind firmly to the skin's creatine and ensure a long-lasting increase in the skin's moisture
- **Iron oxides:** Minerals coated with lipo/amino acids for optimal distribution and adhesion on the skin
- **Titanium dioxide:** Mineral UVB filter, physical sun protection
- **Cinnamic acid derivative:** Synthetic UVB filter
