Vitaforce C Cream

VITAMIN C CREAM

Highly-effective active substance cream for treating the first signs of skin aging: wrinkles caused by dryness and fine lines. Vitaforce C Cream offers reliable assistance. The combination of low- and high-molecular hyaluronic acid ensures noticeable skin smoothness and long-lasting improvement of the moisture content in the upper layers of the epidermis.

Vitamin C phosphate (a stabilized form of vitamin C, which is unstable in water, for use in cosmetic products) penetrates deep into the skin tissue, where it is transformed into active vitamin C. Focus is placed on three effects:

1. In the dermis, vitamin C stimulates the synthesis of new collagen and therefore slows down skin aging. Externally, this is noticeable due to improved skin smoothness.
2. UV radiation and tobacco smoke produce high quantities of free radicals. Vitamin C is an extremely powerful antioxidant which protects the skin against the destructive effect of the free radicals and therefore prevents skin aging.
3. Vitamin C inhibits synthesis of the skin's native pigment, melanin. This brightens the skin's color and improves its radiance. Age spots are reduced and the skin is left looking more even and therefore younger.

A refreshing and reviving extract of lemons supports skin brightening and improves the skin's radiance. Vitamin E acetate (the stabilized form of vitamin E) is transformed into the powerful antioxidant vitamin E (tocopherol) in the skin. It particularly protects the cell membranes against free radicals.

Home care application

Distribute over the cleansed face in the morning and/or evening.

Tip: Vitaforce C Skin Complex is the optimal addition. When applied in combination with Vitaforce C Cream, demanding skin is provided with an unbeatable dual care set for smooth, even skin with improved radiance.

Recommendation: Face Guard Advanced combats premature skin aging with effective light protection. To achieve this, always apply the extremely light lotion beneath Vitaforce C Cream during the day.

ACTIVE SUBSTANCES

- **Vitamin C phosphate:** Stimulates the synthesis of collagen fibers, improves skin smoothness, protects against free radicals, inhibits melanin formation
- **Vitamin E acetate:** Protects cell membranes against free radicals
- **Hyaluronic acid (long- and short-chain):** Immediately noticeable skin smoothing and increased skin moisture; reduces wrinkles caused by dryness
- **Lemon extract:** Refreshing and toning
