

AMPOULES

- Visibly improves the appearance of couperose skin
- Fortifies and strengthens the vascular walls
- Reduces redness and irritation
- Increases the moisture content of the skin

Home care application

Use the JANSSEN COSMETICS capsule opener or alternatively a tissue and break open the capsule neck by applying pressure to the marked coloured ring. Pour the content of the capsule into the palm of the hand and spread onto face, neck and neckline. Massage in gently. Stimulating massages of the reddened skin should always be avoided. Then apply the recommended lotion. Avoid the eyes.

For external use only.

Tip: Sun protection is important. Depending on the intensity of the sun, Face Guard Advanced is ideal. Visits to the sauna, steam baths and brush massages result in facial reddening and should therefore be avoided.

Couperose Fluid

ACTIVE INGREDIENT CONCENTRATE FOR SENSITIVE SKIN WITH COUPEROSE

Couperose Fluid was developed to reduce the appearance of couperose. Characteristics of skin prone to couperosis are redness, dryness and sensitivity. The redness develops as a result of dilated capillaries, also called "telangiectasias" (commonly known as spider veins).

Our Couperose Fluid contains ingredients that have been proven to relieve these symptoms. The sensitive complex strengthens the skin's capillary system and reduces redness. Placebo-controlled studies show an improvement in skin tone (in the case of redness) by more than 30% after two weeks with twice daily application. The number of spider veins can be reduced by 20%*. The extract is used at a concentration of 5% and therefore works very well. Saccharide isomerate and hyaluronic acid provide the skin with long-lasting moisture. Allantoin calms the skin and prevents redness.

The result? The appearance of couperose is reduced and vascular elasticity is promoted. Skin redness appears visibly reduced.

ACTIVE SUBSTANCES

- **Sensitive Complex:** A synergistic plant extract containing the active ingredients of Asian marsh pennywort, butcher's broom, marigolds, horse chestnuts and liquorice roots which strengthens the skin's capillary system and reduces redness. Placebo-controlled studies show an improvement in skin tone (in the case of redness) by more than 30% after two weeks with twice daily application. The number of spider veins can be reduced by about 20%
- **Long-chain hyaluronic acid:** Forms a water-binding film on the skin and thus protects the skin from drying out. fills out fine lines and wrinkles
- **Allantoin:** Soothes skin, reduces redness
- **Saccharide Isomerate:** A skin-identical carbohydrate complex for long-lasting hydration of the skin; 72-hour long-term effect by permanently binding to the keratinocytes of the stratum corneum
